PROFESSIONAL SUMMARY

Full-Stack Developer with 5 years of experience building and shipping scalable, secure, and production-grade web and mobile applications across EdTech, creator economy, and HealthTech-adjacent platforms. Strong frontend expertise in Angular with complementary backend proficiency in Node.js (Express.js) and Python (Django). Experienced in RESTful API design, SQL and NoSQL database management, JWT/OAuth2 authentication, cloud deployment, and cross-functional collaboration. Passionate about clean architecture, data security, and delivering reliable systems that hold up in production.

TECHNICAL SKILLS

Frontend: Angular (5+ years), React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
Styling: Tailwind CSS, Styled Components, SASS/SCSS, Bootstrap
Backend: Node.js (Express.js), Python (Django / Django REST Framework), REST APIs, Microservices
Databases: PostgreSQL, MySQL, MongoDB — schema design, indexing, SQL query optimisation
Security & Auth: JWT, OAuth2, Role-Based Access Control (RBAC), HTTPS/TLS, Input Validation
Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, CI/CD, Netlify, Vercel
Mobile: React Native — cross-platform iOS & Android (Google Play Store deployments)
Tools: Git, GitHub, Postman, VS Code, Figma (handoff), IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Full-Stack Developer | *Freelance / Self-Employed* 2020 – Present

- Built and shipped production-ready full-stack web applications, leading both frontend (Angular, React.js, Next.js) and backend (Node.js, Django) development from architecture through deployment.
- Developed scalable, secure RESTful APIs using Node.js (Express.js) and Python (Django REST Framework), implementing JWT authentication, OAuth2, RBAC, and robust middleware architecture.
- Architected and managed relational databases (PostgreSQL, MySQL) and NoSQL databases (MongoDB) — designing schemas, optimising SQL queries, and implementing indexing strategies for performance at scale.
- Deployed and managed production services on AWS (EC2, S3, RDS, Lambda), ensuring high availability, security compliance, and scalable infrastructure for data-sensitive platforms.
- Implemented microservices patterns and modular backend architecture, enabling independently deployable, maintainable service components across multi-domain projects.
- Delivered end-to-end solutions across EdTech and creator economy platforms — from system design and API development to frontend integration, deployment, and post-launch maintenance.

Software Engineer Tutor | *NextGen Africa* Jan 2026 – Apr 2026

NextGen Africa is a technical institution offering training in software engineering, AI automation, cybersecurity, product design, and digital business.

- Designed and delivered a structured three-month fullstack development curriculum, taking students from fundamentals to shipping deployable, production-quality projects.
- Provided technical leadership through code reviews, architecture guidance, and one-on-one debugging sessions, emphasising clean code, API design, and database best practices.
- Mentored aspiring engineers on authentication systems, SQL/NoSQL database management, and secure deployment pipelines.

SELECTED PROJECTS

Faveclub — *Full-Stack Developer* — *Artist-Fan Royalty Platform*

- Architected and built the complete backend using Node.js (Express.js), designing a MongoDB database for user and transaction data, implementing JWT authentication and role management.
- Built responsive, data-driven frontend UI components using React.js with seamless API integration and secure user dashboards.
- Deployed to production on Netlify with a focus on security, reliability, and performance under real user load.

Live Site: <https://faveclub.netlify.app>

PushNDeliver Rider — *Lead Mobile Engineer* — *Logistics Platform*

- Developed a cross-platform mobile application using React Native with real-time order tracking, live delivery status updates, and seamless backend API integration.
- Implemented background location services, push notifications, and secure authentication flows for a field-ready rider experience.

Play Store: <https://play.google.com/store/apps/details?id=com.linq.pushndeliver.pndrider>

Skipa Rider — *Lead Mobile Engineer* — *Ride-Hailing Platform*

- Architected a fluid, interactive mapping experience for driver routing, trip acceptance, and real-time navigation with complex async flows and background GPS tracking.

Play Store: <https://play.google.com/store/apps/details?id=com.pushndeliver.pndrider>

NextGen Africa Website — *Full-Stack Contributor* — *Institutional Platform*

- Contributed core frontend components and backend API integrations to the institutional platform, ensuring responsive design, consistent UX, and reliable data flows across all pages.
